

# **USER MANUAL**

## **INTRODUCTION**

Thank you for selecting the FEAT Gesso Wood Panels. The surface of this product is meticulously sealed with Gesso primer. It is exclusively designed for application with pigments like oil paint, acrylic, tempera, gouache, and mineral color. Please refrain from using it for any other type of painting.

## **WARNINGS**

- \* By purchasing this product, you've agreed that you are fully aware of and accept the natural characteristics of the primary materials described in its section, which should not be cited as the grounds for any product return or refund.
- \* Utilizing solvent-based pigments or liquids, or employing rough painting techniques may lead to issues such as oil leakage, cracking, and peeling of the panel coating. The results from such actions are considered personal choices and will not be seen as product defects.
- \* Our product has undergone a comprehensive anti-corrosion treatment. During the process, distinct transparent yellow marks may have developed, which are a normal byproduct of the treatment and do not affect the product's performance.

## **PRIMARY MATERIALS**

\* Less than 3 mm thick, the plywood assembled as the surface with the wood veneer sheet less than 0.015 mm thick serves as the base for pigment adhesion, and might, albeit rarely, exhibit the following conditions:

1. Peeling, flaking, or fraying at the edges.
2. Presence of knots on the front or the backside.
3. Grease may be seen in certain areas of the wooden frame.
4. Lumps or holes from the knots might have been filled with powder.

\* Wooden battens supporting the panel are sourced from Finnish pine or North American spruce, with visible Lumps or holes from the knots.

\* When lying flat on a surface, the wood warping of the panel should not exceed 1.5 cm from any of the four corners.
